

# Eversource Incentive Program

## Path 1: NZE/Deep Energy Savings:

Teams commit to a goal of NZE, NZE Ready with a focus on EUI target of less than 25 EUI

### Provide incentive funding to support low energy use building

- \$1.25/SF at End of Design: Satisfy target of less than 25 EUI (Energy Use Intensity)
- \$1.00/SF 1 year after Construction: Satisfy target of less than 25 EUI

\$254,250 = Total potential incentive based on 113,000 sf

Program also provides:

- \$3,000 towards Net Zero Energy or Passive House Certification
- Design Team incentive up to \$15,000 (after construction is complete)

# Eversource Incentive Program

## Requires:

- a. Design team to provide additional energy modeling throughout design
- b. Enhanced Commissioning of building envelope
- c. Meet Mass Save Minimum Requirements
- d. Report out and coordinate with Eversource during design and after construction
- e. Follow up services by design team after construction
- f. Include submetering/data storage for EUI data collection
- g. Involvement by Facility or Energy Manager (school district) during design and after construction is complete
- h. Commitment by faculty and staff to achieve goals
