

# 2021-2022 TMS Intervention Model

## Entry Plan Question

How do we create an intervention model/opportunities for students to receive extra support within general education or extension?

# What is Intervention?

Intervention is a model that assesses students' mastery of skills, identifies areas in need of further development or extension, and then provides differentiated learning experiences (often in small groups) to provide targeted support or enrichment.

# How will we achieve this at TMS?

- Our new schedule will provide a 45-minute “What I Need” (W.I.N.) Period for ALL students
- We will use and analyze data in collaborative work times
- Staffing Changes (i.e. Literacy Specialists, Math Specialists, Reading Specialist)
