

Westwood Public Schools Launches a Smartphone App for School Menus

Yes, even for school lunch, there is an app for that!

In today's technology driven world, the nutrition program at Westwood Public Schools is both keeping pace and leading the charge. The nutrition program is one of the first school nutrition programs in the nation to launch the mobile app for school menus.

The free app, called School Lunch by Nutrislice, is available in the [Apple App Store](#) for iPhones and in [Google Play](#) for Android phones. The menus information are also available via westwoodps.nutrislice.com

The smartphone app shows each day's menu, including pictures and descriptions of the foods. It also lists nutritional information for each food and makes finding common allergens simple.
