

Internet Safety for
Kids & Families Program

Trend Micro has made a commitment to support the communities where its employees live and work and beyond. In 2008, we founded our Internet Safety for Kids and Families (ISKF) program, extending our corporate mission of making the world safe for the exchange of digital information to the world's youngest citizens. The ISKF program's mission is to help youth become safe, kind, and savvy technology enthusiasts. To accomplish this, we engage in a number of activities around the world to educate and raise awareness about a wide range of issues, trends, technology and its uses so that every child, parent, and school has the knowledge they need to use technology in successful and productive ways.

Today, we are a global network of volunteers in a dozen countries, working with and alongside communities, non-profits, technology and media companies, and many others to make the Internet a better place for kids and families.

Being Great at Being Online – It takes all of us

Join us for an evening with Westwood High School students and Lynette Owens, founder and global director of Trend Micro's Internet Safety for Kids & Families program, as we tackle some of the most common, confusing, and challenging issues facing young people growing up in a constantly internet-connected world. How does social media impact peer and family relationships? What are the expectations of online privacy for ourselves and for others? What are some pitfalls and hacks for making sure we are in control of technology and it is not in control of us? How do we use the Internet fully while keeping in mind our futures?

Hear some engaging discussions and come prepared with your questions and concerns. We highly encourage students grades 4-8 and their parents to attend this event together. Our hope is that by discussing these issues as a community, we will understand and find new and more ways to support our students so they don't just survive but thrive online.

- Tuesday, October 18
- 7-8:30pm
- Westwood High School Auditorium
