

# Ever wondered if your child's development is on track?

## The ASQ-3 can help

The Ages and Stages Questionnaire (ASQ-3) is a set of questionnaires about children's development (birth to 5 1/2 years) that helps to identify areas of strength as well as any areas that may need support.

Parents fill out the 10-15 minute questionnaire at home which screens communication, physical ability, social skills & problem solving.

On completion the Early Childhood Professional (ECP) will set up a confidential meeting to discuss the results with you. If your child is on track, you can follow their progress by re-screening later on. If your child is having difficulty in any area the ECP will help you with next steps.
