

# Video Production

*Create  
Respond  
Communicate*

Video Production I and II & III, are exciting, hands on, project based classes where you learn to use video cameras, light, microphones, and professional level editing tools. You can create your own video, from the development of the idea, to the final cut.

Learn to persuade, explain, and entertain! You'll create a variety of commercials, short independent films, news broadcasts, public service announcements, and a community service shoot.

Through this series of classes, you'll build upon the skills learned in the previous class, while taking your communication and storytelling abilities to new heights.

Many of our students have been awarded "Scholastic Art Awards" in recognition of their short films!
